VeraStack Labs

ANSWER ENGINE OPTIMISATION

Your customers stopped searching. They ask.

And when they ask ChatGPT or Google's AI who to buy from, the answer names a few businesses. Is yours one of them?

WHAT CHANGED

8%

PEW RESEARCH, 2025

Share of Google visits with a click on a result when an AI summary appears. 15% without.

34.5%

AHREFS, 2025

Fewer clicks to the top result when an AI Overview sits above it.

800M

OPENAI, OCT 2025

People asking ChatGPT questions every week. Many of them are your buyers.

ASK AN AI ABOUT YOUR OWN BUSINESS TONIGHT

01 "What is the best [your category] in [your city]?" Are you named?

02 Ask about your prices, menu or latest product. Is the answer current?

03 Ask for an alternative to a competitor. Do you come up?

04 Ask what your company does. Is it right, or a guess?

If the answers are stale, wrong or name a competitor, that is lost demand you never see in your analytics. AEO is making sure the models know you, and say so.

AI visibility audit

We ask ChatGPT, Gemini, Perplexity and Google AI what your buyers ask, and show who they name.

Fix what they read

Crawler access, schema, llms.txt, answer-first pages and fresh facts the models can quote.

Keep it current

Monthly checks, so a new product or price reaches the answers, not just your website.

ALSO, FROM THE SAME STUDIO

Websites and revamps, web and mobile apps, SaaS builds, maintenance, SEO and product videos. First call is free, with no obligation: we look at where you are and what fits.
